Section 1 – Conflict Minerals Disclosure

Item 1.01 – Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

In order to comply with Rule 13p-1 (17 CFR 240.13p-1) promulgated under Section 13(p) of the Securities Exchange Act of 1934, as amended, Photronics, Inc. (the “Company”) submits this Form SD, specialized disclosure report (“Form SD”). As defined in Form SD, the term “conflict mineral” means columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin, and tungsten, or any other mineral or its derivatives determined by the U.S. Secretary of State to be financing conflict in the Democratic Republic of the Congo or an adjoining country (as defined in Form SD).

The Company has determined that tantalum is a conflict mineral which is necessary to the functionality or production of certain products manufactured by the Company.

The Company has conducted a good faith, reasonable country of origin inquiry with respect to the tantalum used in the Company’s products for the calendar year ended December 31, 2020, which such inquiry was reasonably designed to determine whether any of the conflict minerals originated in the Democratic Republic of the Congo or any adjoining country. Based on this country of origin inquiry, the Company has no reason to believe that any of the tantalum necessary to the functionality or production of products manufactured by the Company in 2020 originated in the Democratic Republic of the Congo or any adjoining country unless they originated from recycled or scrap sources (as defined in Form SD) or from sources which have been assessed and approved by independent, internationally recognized, and reputable third parties.

In order to make this determination with respect to the country of origin of its tantalum, the Company undertook the following inquiry:

- Identified all suppliers of tantalum to the Company;
- Provided all such suppliers with a Conflict Mineral Reporting Template developed by the Responsible Minerals Initiative (formerly the Conflict-Free Sourcing Initiative), a global non-governmental organization in the area of responsible minerals sourcing, and asked these suppliers to indicate whether any conflict minerals included in any component manufactured or contracted to be manufactured for the Company originated in the Democratic Republic of the Congo or any adjoining country, and if so, whether such conflict minerals were from recycled or scrap sources, whether they have identified all of the smelters supplying conflict minerals in their supply chain, and asked such suppliers to provide a list of the smelters used by the supplier or their suppliers, the locations of such smelters’ facilities, and whether those smelters have been certified as a “Conflict-Free Smelter” by the Responsible Minerals Initiative; and
- Obtained a representation letter from each of the Company’s photomask materials suppliers certifying that any such tantalum (i) did not originate in the Democratic Republic of Congo or any adjoining country or (ii) came from recycled or scrap sources, or from sources which have been assessed and approved by independent, internationally recognized, and reputable third parties.

This conflict minerals disclosure is available on the Company’s website at www.photronics.com.
